

PREFACE

Constitution

The international stations and the Medias from around the world conducted short and long interviews with the people who are involved with drafting the constitution. These individuals set aside their work to cover this event which is called the Iraq permanent constitution. This ability to work together by all side was good for building better relations. The constitution consists of a set of essential principles which organize the competence of the authorities and the fundamental human rights and freedoms, in order not to be opposed with the constitution .according to this constitution, these relations will be done between the society and this also will embody the restrictions and

commitments and will look at it as the most common sublimity rules and this sublimity is a good guarantee for human rights and freedoms. There has never been a constitution in the world that has been unanimously endorsed by all people. There should be an opposed opinion and a disagreement opinion. The different opinions and ideas are always something normal. The difference is not controversy but the thinking, the persuading and introducing opinions away from weapons and the violence and the intimidation. Of course, this is what the faithful Iraqi people are aiming to do by opening a new file or new page of the patriotism and humanity relations. Whatever the approach to accepting the new Iraqi constitution, it seems from the questionnaires and media reports that the constitution is supported and entrusted by the largest section of Iraqi people, who willingly want to rebuild a new free democracy Iraq.

You as Iraqis citizens, endured to grant victory and struggle in an honorable way which achieved a fruitful results by proving a new advanced constitution. A constitution which does not minimize any body but firmly establish a develop law to identify all Iraqis duties and rights according to human rights laws. These rights are the perfect Kurdish rights that should be given to them and to allow them to enjoy their rights in the Federal Kurdistan region. We as Kurdish Yazidian were minimized during the past years and were a forgotten class till the uprising of the march 1991. After the forming of Kurdistan regional parliament and government, we enjoyed our national, religious and cultural rights. These are the new steps (tasks) of the Kurdistan regional

government and it has become clear from the President Barzani's speeches in some occasions when he said that "Yazidian are the progenitors of Kurds" the other one was in Khanik. When he said, "who trespass on Yazidian rights is trespassing upon the Kurdish national security", from these important speeches, we can educe that Yazidian are the indigenous Kurds and also it emerges from our history, customs, traditions, language.....etc. The President Barzani is not only content with words but with deeds. It was truth that he was eager and resolute for the fixation of Yazidian religion between the Unitarianism religions in the constitution. I say that he was desiring and no forgetting us when he sent an invitation to the chairman of lalish center, Peer Khider Seleman, in order to be one of the members in the Kurdish deputation (delegation) to participate in the sessions of drafting the constitution in Baghdad. Indeed our fellow was attend in those sessions with the other members, representatives and chairmen of the political parties who participate in the process of drafting the constitution .for this occasion and by the names of all the members of social and cultural center of lalish and all its branches, we are thankful and grateful to the President Barzani and the Kurdish delegation for their efforts for fasteing yazidian in the permanent constitution .

Yes for the referendum

After Iraqis strove for drafting the permanent constitution for Iraq to keep all nations, religions and rights to guarantee their unchained opinions, and their expressions to speak with their original language and do their religious and sectarian ceremony.

We endowed by this constitution for the exorbitant sacrifices that the Iraqi people presented for saving their country from the dictatorship arbitrariness, the racialism and the sadamic chauvinism. We as Iraqi people should continuously spend our efforts for fixing the draft of this constitution by the Iraqi people while they will say yes for the constitution. that is the most important and critical stage for blocking the way on the enemies of Iraq and the remains of sadam's regime who threaten that terrorism and fright will remain in Iraq. Each yes for the constitution is like a bullet in the fragile body of the terrorism and it is a true invitation for making civilized society away from oppression and tyranny. A society which Arab, Kurd, Turkman, and Keldo-Assyrian should be in the same citizenship class in addition of protecting the rights of the religious minorities and ethnics. For the first time in the history of Iraq, Yazidian religious' rights are fixed frankly and obviously in the new Iraqi constitution the name of the Yazidian religion is appeared in the new Iraqi constitution. it is an invitation for all Iraqis for keeping their personal rights in the permanent constitution by participating in the referendum which will be held in the 15th of December 2005, by saying "yes" which is one of the national duties and being in responsibility towards Iraqi society . the Kurdish citizens determine to say "yes, yes" for the new permanent constitution ,and especially in the liberated areas of Kurdistan regions like Shengal, Zummar, Musol plain, Shekhan, Khanaqeen ,Kirkuk, Makhmur, and the other places. So the success of the referendum by saying "yes" ensure for everybody to rejoin to Kurdistan region as soon as possible and enjoying the existent secur-

ity and stability in the Kurdistan region .

Finally the constitution is accepted

We were, as Iraqi people patiently waiting the day of referendum which was held on the 15 of September 2005. All the Iraqi people felt happy after announcing the results of this referendum, because 78% of Iraqi people said "yes" for the constitution. The enemies of Iraq were frustrated by this percentage. According to the Iraqi law, this draft was accepted by gaining 78% opinions of Iraqi people. Now we are about to start (enter) a new phase which is more important than the phase of referendum .It is the phase of the coming elections. According to these elections, Iraqi new national assembly and government will be elected for 4 coming years. We as the people who

said "yes" for the constitution have another more important duty. This duty is how to elect for a new national assembly which will be free from radicalism, racialism, and chauvinism. We ask the Kurdish people, especially the newly liberated region to go to the ballot boxes in the 15 of December. Because our fate (live) is connected with this election for rebuilding a new democratic, federal and multi parties Iraq government. God willing Iraq will be a safe and peaceful domicile (home land) for all Iraqi.
